Missing Persons Case 1

Your first missing persons case

In a missing persons case, we typically get the name first, focus on it, and write down all of the information we get based on the energy of the name.

Take your time with this before moving on to the next step, the photo.

On the next page is solely the name of your first missing persons case. On the page after will be their photo.

Take your time to write down and feel what may have happened to this individual. In a separate document we have provided the answers to provide you the answer. Although we don't have every single detail, be specific. If you feel the person is wearing a red sweater, write it down! Trust Spirit.

Tamara Milograd

Take your time and write down everything you get just on the energy of the name before moving on to the picture of this missing person on the next page.
